Problem Statement

A SPORTS CLUB Management System is a sports club membership management system where you can keep records on your members and have quick and easy communication between you and your members .

- The main objective of the project is to develop a software that facilitates the data storage , data maintenance and its retrieval for the club in an igneous way
- To store the record of the customers , the staff that has the privileges to access , modify and delete any record and finally the service , club provides to its customers .
- Also , only the staff has the privilege to access any database and make the required changes , if necessary .
- To develop easy to use software which handles the customer-staff relationship in a effective manner .
- To develop a user friendly system that requires minimal user training . Most of features and function are similar to those on any windows platform

Hardware Requirements:

Processor: - Pentium I or above.

RAM: - 128 MB or above.

HD: - 20 GB or above.

Software Requirements :-

Front end- PHP

Back end- MySql

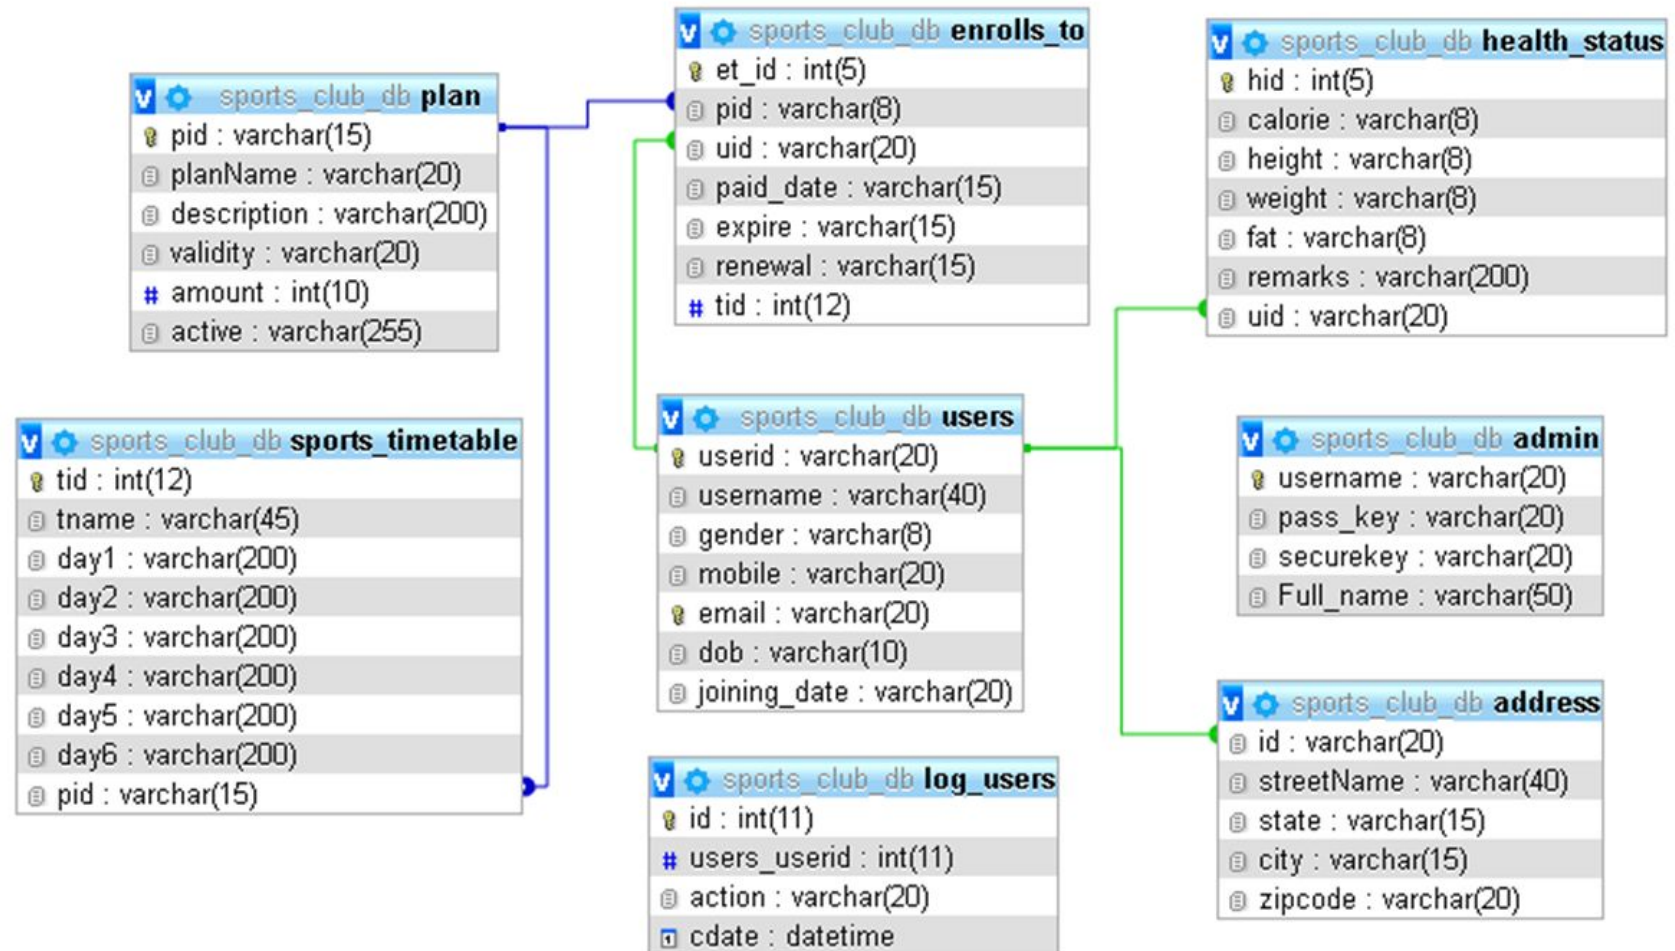

Server - XAMPP

TRIGGERS :

```
CREATE TRIGGER `deletelog` BEFORE DELETE ON `users`  
FOR EACH ROW insert into log_users values(null,old.userid,'deleted',now())
```

```
CREATE TRIGGER `insertlog` AFTER INSERT ON `users`  
FOR EACH ROW insert INTO log_users values(null,NEW.userid,'inserted',now())
```

```
CREATE TRIGGER `updatelog` AFTER UPDATE ON `users`  
FOR EACH ROW insert INTO log_users values(null,new.userid,'updated',now())
```

These triggers are used to display the action performed in the users table i.e. insertion, deletion or update and reflects these changes in log_users table.

STORED PROCEDURES :

DELIMITER \$\$

```
CREATE DEFINER='root'@'localhost' PROCEDURE `countGender`()
```

```
SELECT gender , COUNT(*) from users group by gender$$
```

```
DELIMITER ;
```

This procedure will count and display the number of males and females in the users table.

The screenshot shows the phpMyAdmin interface for a MySQL database named 'sports_club_db'. The left sidebar displays a tree view of databases and tables. The main panel shows the execution of a SQL query: `CALL `countGender`();`. A green message box indicates that the query was executed successfully, affecting 2 rows. Below the query, the execution results of the routine 'countGender' are displayed as a table:

gender	COUNT(*)
Female	3
Male	4

Below the results, there is a 'Filters' section with a text input field labeled 'Containing the word:'. At the bottom, the 'Routines' section shows a table of routines:

Name	Action	Type	Returns
<input type="checkbox"/> countGender		PROCEDURE	

Below the routines table, there is a section for 'Check all' and 'With selected:' with corresponding 'Export' and 'Drop' buttons.
